Uvod

Introduction

Kristalno more, pješčane plaže, divlje planine, kanjoni, plahovite vode, jedinstveni mediteranski fjord - nevjerovatno šta je sve stalo na ovom malom prostoru.
Ako je priroda nečim izdašno podarila ovu kamenitu i planinsku zemlju, onda su to plaže - pješčane, šljunkovite, kamenite, stjenovite...

Od malih i tihih primorskih mjesta u Bokokotorskom zalivu, u kojima je ponta ljeti mjesto za kupanje i uživanje, a tokom godine prostor društvene komunikacije, preko fascinantnih pješčanih plaža Budvanske rivijere na kojima buja život, pa do dugih plaža vrelog i sitnog pijeska u Ulcinju – Crna Gora nudi sve.
Pijesak je bijeli, sivi, zlatni i crveni.
More je svih nijansi plave.

Mirna i divlja plažica daleko od civilizacije, ponta u ribarskom naselju, usamljena nudistička plaža, plaža za partijanere ili za uživanje... najljepši zalasci sunca.

Možete da birate.

Dobrodošli!

Predrag Jelušić

Crystal-clear seas, sandy beaches, wild mountains, canyons, rough waters and a unique Mediterranean fjord – it is unbelievable that all this exists in such a small area.

If there is anything the nature has bestowed in abundance to this rocky mountainous country, it is its beaches – sandy, pebbly, rocky, and craggy.

From the small silent coastal places in the Bay of Kotor, whose jetties serve swimmers during the summer, and are social venues for the rest of the year, through the numerous sandy beaches of the Budva Riviera always vibrating with life, to the long sandy beaches to be found in Ulcinj – Montenegro offers everything.

The colour of the sand varies between white, grey, gold and red.
The sea boasts all possible shades of the colour blue.

A small, slightly wild, little beach far away from civilization, a jetty in a fishing village, a lonely nudist beach, a beach for party animals or family leisure... the best sunsets.

The choice is yours.

Welcome!
